PROJECT DESCRIPTION

Currently, our planet faces several serious problems, there are :

- the scarcity of oil resources used as fuel for vehicles
- a lot of air pollution caused by numerous gasoline and diesel vehicles

So, to help reduce all of these we providing an **eco-friendly electric vehicle rental website.**

ACTOR OVERVIEW

CUSTOMER

- Sign up for an account
- Manage & update profile
- View list of available vehicles
- Take an order to rent vehicles
- Make payments using various methods
- Cancel an order
- View rent status & history

ADMIN

- Manage transportation data
- View list of registered users
- Manage user booking
- View financial statements
- Manage payment methods
- Verification identity users

NON-USER

- Accessing home page
- View & search for products
- Logging in & registering an account

APPLICATION FLOW

This is an easy and simple way of how the app works

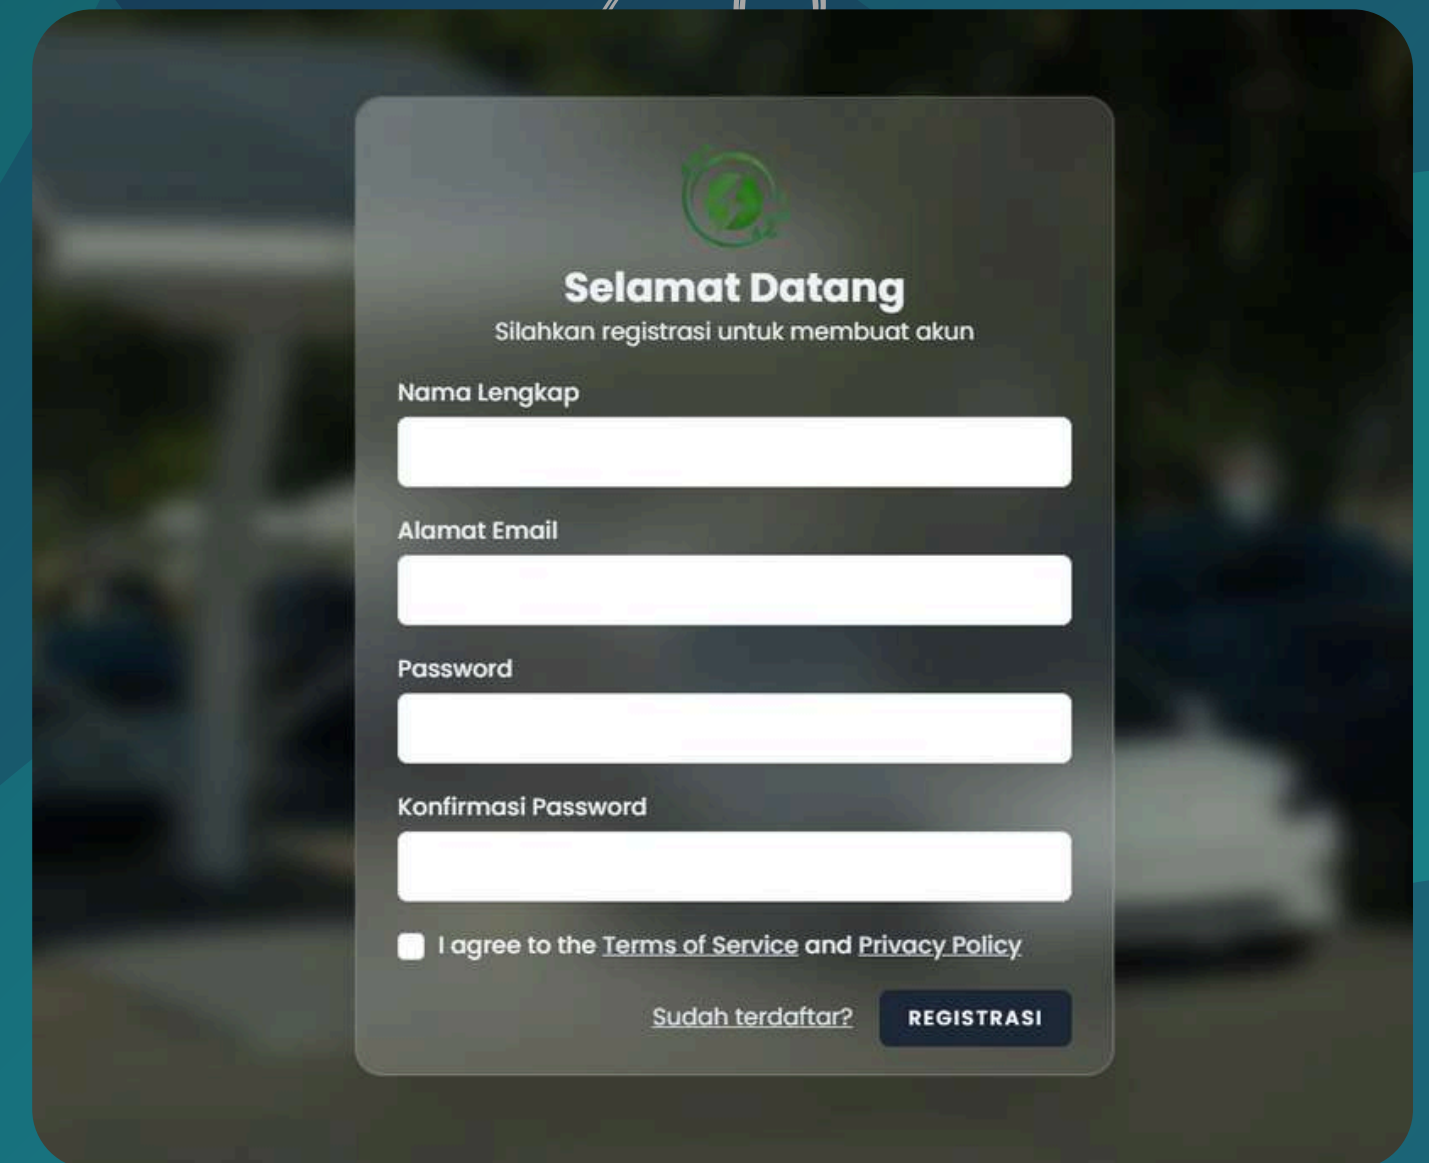

APPS IMPLEMENTATION

Register Page

The screenshot shows a login interface with a dark background and a blurred image of a parking lot. At the top, there is a green circular logo with a globe icon. Below it, the text "Selamat Datang" is displayed in bold, followed by "Silahkan login untuk melanjutkan". The form includes an "Alamat Email" field with the text "voltrans.app@gmail.com", a "Password" field with masked characters, and a "Lupa password?" link. There is a checkbox labeled "Ingat Saya" and a "Log In" button. Below the login section, there is a separator line with the text "ATAU LANJUTKAN DENGAN" and a "Masuk dengan Google" button with the Google logo. At the bottom, there is a link that says "Belum memiliki akun ? [Daftar disini](#)".

Login Page

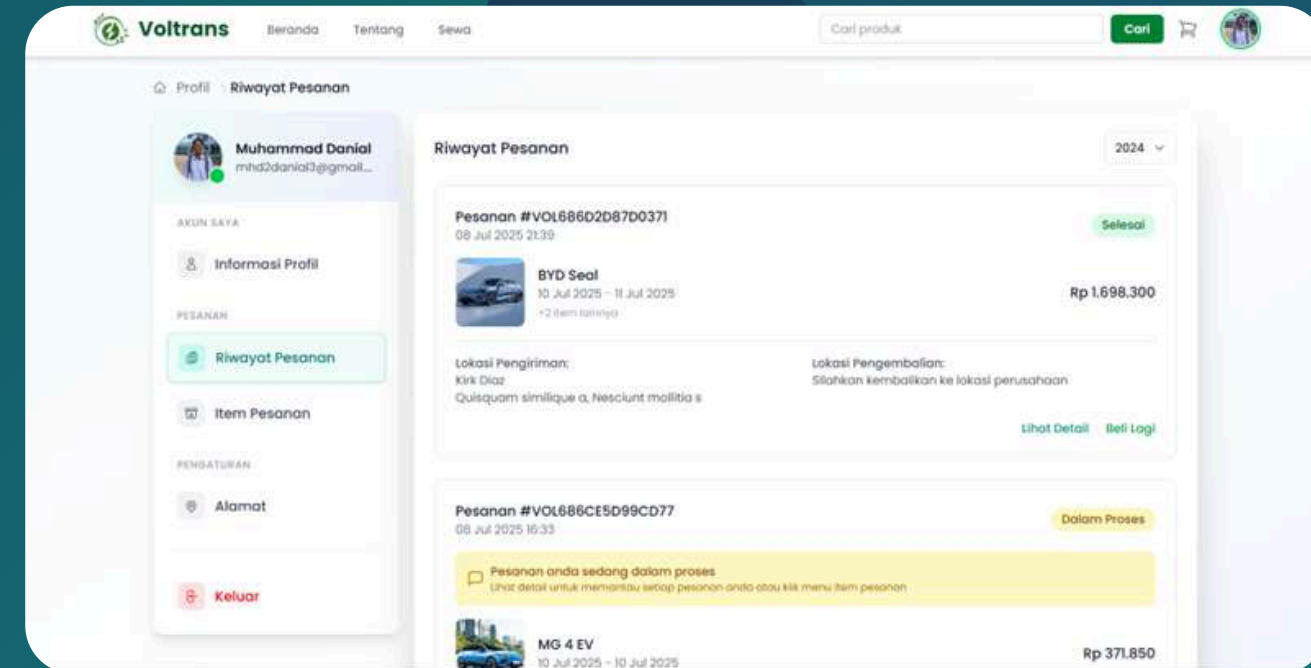

The screenshot shows a registration interface with a dark background and a blurred image of a parking lot. At the top, there is a green circular logo with a globe icon. Below it, the text "Selamat Datang" is displayed in bold, followed by "Silahkan registrasi untuk membuat akun". The form includes a "Nama Lengkap" field, an "Alamat Email" field, a "Password" field, and a "Konfirmasi Password" field. There is a checkbox labeled "I agree to the [Terms of Service](#) and [Privacy Policy](#)". At the bottom, there is a link that says "Sudah terdaftar?" and a "REGISTRASI" button.

APPS IMPLEMENTATION

Admin Management

The screenshot shows the 'Tambah Produk' (Add Product) form in the VOLTRANS system. The left sidebar is identical to the dashboard view. The main form area is titled 'Tambah Produk' and includes a breadcrumb 'Produk > Buat'. It contains several input fields: 'Nama Kendaraan' (filled with 'MG 4 EV'), 'Harga' (filled with 'Rp 275000'), and 'Jenis Kendaraan' (a dropdown menu set to 'Mobil Listrik'). A 'Deskripsi' field contains detailed text about the MG 4 EV 2025. Below the text fields is a 'Gambar Kendaraan' section with a main image of a blue car and a 'Gambar Tambahan' section with three smaller image thumbnails. Each image has a 'Penggugahan selesai' (Upload complete) status.

EXAMPLE TEST OUTPUT

A. User Register Page			
Test Scenario	Expected Result	Test Result	Status
Empty all fields on the account registration form and immediately pressing the button.	The system forces the user to fill in the fields on the registration page.	The system prompts the user to fill in the fields on the registration page.	Success
Fill in the full name, email address, and password fields. Then filled in the password confirmation field with the wrong password, for example: 123456.	The system rejects the data and shows that the registration failed or error.	The system provides an 'error' form with notes on 'validation.unique' and 'validation.confirmed'.	Success
Fill in all fields with valid data and check the terms of service and privacy policy. After that, press the registration button.	The system receives the data and directs the user to the home page.	The system accepts the data and directs the user to the home page.	Success

REGISTER PAGE ANALYSIS RESULT :

- Number of tests performed : 3 tests
- Percentage of successful test $3/3 = 100\%$
- Percentage of failed test $0/3 = 0\%$

F. Checkout and Payment Page

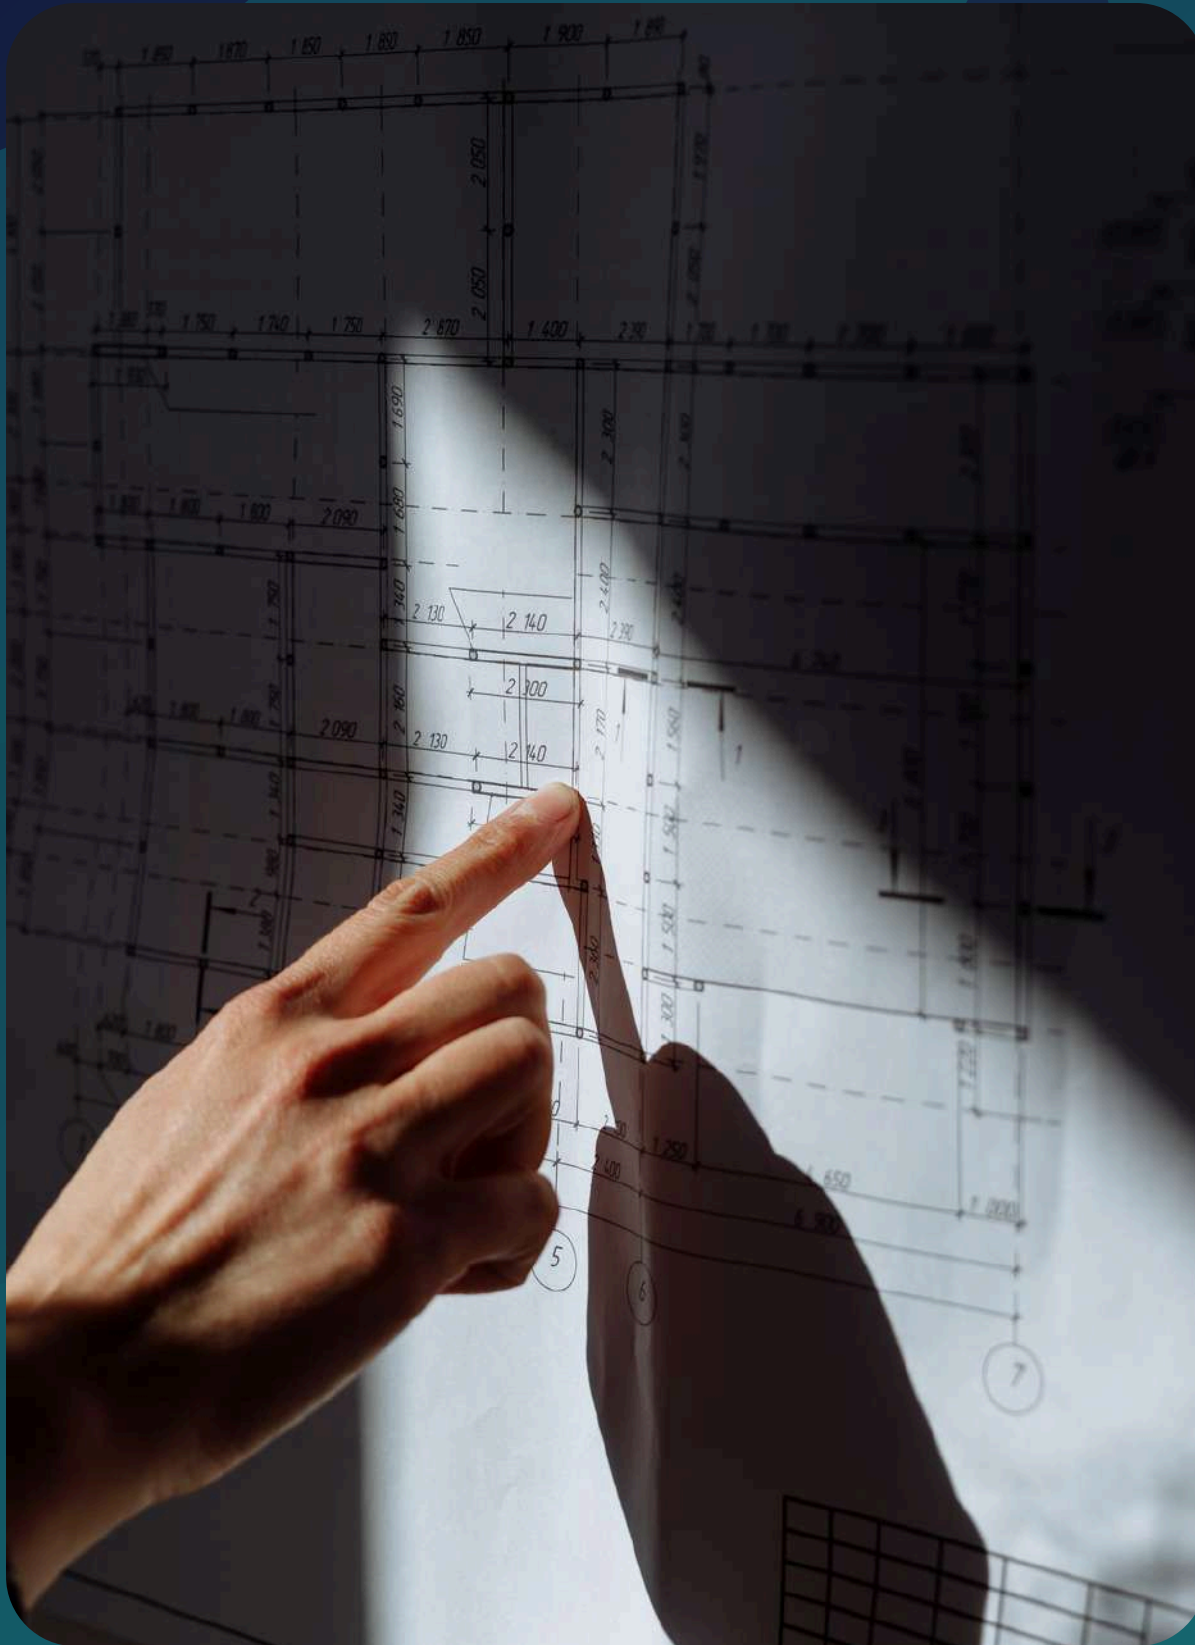

Test Scenario	Expected Result	Test Result	Status
On the product details page, the user determines the start and end dates of the lease. end date of the lease.	The system receives the data and provides a valid price to the user regarding the product product.	The system responds by providing a valid price for the rental price of the product to the user. to the user.	Success
After the user determines the date, then the user presses button 'Rent Now!'	The system directs the user to the checkout page.	The system responds by directing the user to the checkout page.	Success
On the checkout page, the user enters a valid mobile phone number and determines where to pick up the product. Then the user presses the checkout button.	The system receives the data and gives the user detailed information regarding the order and waiting for verification of the order by the admin.	The system responds well and shows detailed information related to the user's booking and waits for admin verification regarding the booking.	Success
When the verified, the user continues by pressing the 'pay now' button.	The system directs the user to the payment page.	The system responds by directing the user to the payment page.	Success
On the payment page, the user determines what type of payment he wants to make, for example: transfer through BCA bank.	The system waits for confirmation regarding the payment made by the user and 2 minutes to make the payment. payment.	The system responds by waiting for the payment process from the user and 2 minutes to make a payment.	Success

CHECKOUT AND PAYMENT PAGE ANALYSIS RESULT :

- Number of tests performed : 5 tests
- Percentage of successful test $5/5 = 100\%$
- Percentage of failed test $0/5 = 0\%$

So, this is roughly how we test our systems.

And here we can declare that our **Voltrans** is now ready to use!

OUR FUTURE HOPE

- 📌 Improving project management and communication with our team
- 📌 With this website, we hope to keep the earth clean and unpolluted.
- 📌 Keep improving the feature & make customers more comfortable when using this application.

THANK YOU!
